

Local Search

The Elements of Local Search

Website Optimization - What you see and what Google sees is different. We make sure Google knows all about the services you provide.

Cornerstone Pages - Google loves content. Cornerstone Pages target a keyword and are content rich.

Blogs - The only thing Google loves more than content, is fresh content. We do this in the form of a blog. We target these blogs specific to keywords that are relevant to your Cornerstone Pages.

Directory Management - Not all directories are created equal. We make sure your business information is consistent on the directories that matter most.
